Interactive Number Line:

Description:

A number line with 0-10 represented the following ways: number name, numeric symbol, 1:1 correspondence representation. The slide frames the targeted number.

Tools:	*Materials:*
Scissors	Template: https://rebrand.ly/NumberLine
Laminator	2x, 3-5 mil lamination pouches
	Packaging tape

Assembly Instructions:

1. Laminate all number line pieces, including "0" and the black slide frame.

2. Trim the top and bottom edges of the 0, 1-5 and 6-10 strips to the same width. Cut around the gray form next to the "0"; this is the bumper to keep the slide from sliding off.

3. Tape together 1-10. Use packaging tape on both front and back to create a smooth seam. Add "0" to the front of the numberline in the same fashion.

Option 1: Use sliding frame

• Score, then cut the inside vertical edges of the frame, as indicated. Slide onto the number line, and move along the number line, as needed.

Option 2: Tactile Counting

• Add foam dots (punch holes in adhesive foam sheets) or self-stick craft gems (pictured) to the images associated with each number to show 1:1 correspondence
one	two	three	four	five
1	2	3	4	5
| six	seven	eight	nine	ten
6	7	8	9	10

zero

0

Score,
then cut along
vertical edges
